

Summary

Data Engineer with a total of 3 years of experience in big data processing, building and optimizing scalable ETL pipelines. Experienced in **Pyspark, AZURE/AWS Services and Databricks** for processing enterprise data in ADLS/S3 and Delta Lake. Strong background in **Big Data, Data Warehousing, Distributed Systems, Lakehouse Architecture, CI/CD and PostgreSQL**.

Skills

Languages: Python, SQL, C++, Golang, Java

Databases: PostgreSQL, MySQL

Concepts & Tools: Hadoop, Distributed System Design & Implementation, Data Modeling, Agile, Jira, Azure DevOps/Git

Cloud Services: Azure - ADF, Databricks, Synapse, Azure Key Vault, ADLS, DevOps, CosmosDB, Fabric

AWS - Glue, Athena, Lambda, EMR, S3, EC2, RedShift, Relational Database

Certification: Microsoft Certified: Azure Databricks Data Engineer Associate. ([Cred.](#))

Experience

Data Engineer | Reliance Jio Infocomm Limited - Mumbai

May 2023 – June 2025

Reliance Smart - Retail

- Architected, maintained and troubleshoot production ETL pipelines on Azure Databricks (PySpark + Spark SQL), ingesting 50M+ daily records across CSV, Parquet by cutting time-to-insight by 40%.
- Reduced annual cloud costs by 30% by re-engineering Spark job configs, right-sizing clusters, and optimizing queue allocation - delivering the highest ROI technology initiative of FY2024-25.
- Designed and implemented a Medallion Architecture (Bronze, Silver, and Gold) using Databricks Unity Catalog to build a governed Lakehouse platform. Developed a near real-time ingestion framework for scalable, reliable, and efficient data ingestion across multiple data layers.
- Created data quality validation frameworks to verify schema consistency, null handling, duplicate detection, and business rule compliance across retail data pipelines resulting increase in 11% quality enhancement.
- Diagnosed and resolved pipeline bottlenecks by tuning executor memory, shuffle partitions, and broadcast join threshold. And Implemented Azure Synapse Analytics as the enterprise data warehouse to support scalable reporting and business intelligence.
- Used Azure DevOps for sprint planning, task tracking, and Agile collaboration; managed user stories and tasks, participated in daily stand-ups, sprint reviews, and retrospectives, and contributed to capacity planning and workload balancing.

ECourts Of India - Gov. Client

- Executed an analytical pipeline for the judicial system at the district and state level leveraging Azure Data Factory, Databricks, Power BI and Synapse Analytics with star schema data modeling following Lakehouse architecture.
- Built a data transformation framework for incremental data leveraging Delta Lake using Databricks (UniForm) to ensure consistent, varied user, high-quality datasets for judicial analytics for a multi-cloud environment.
- Developed CI/CD pipelines using Azure DevOps to automate the deployment of Azure Data Factory pipelines, Databricks notebooks, and related project artifacts across environment.

Research Intern: Big Data | Indian Institute of Tropical Meteorology - Pune

Jun 2022 – Feb 2023

- Worked on large-scale geo-spatial meteorological datasets, Spark processing, ETL transformation on structured data, Data Validation, and Segmentation.
- Developed machine learning-based cloud identification and trajectory prediction models using K-Means clustering and computer vision techniques, contributing to research on automated cloud detection and tracking.

Projects

- **eCourts India - End to End Data Engineering Pipeline [Azure]** ([Github](#))
- **YouTube Trending Data Analytics Pipeline [AWS]** ([Github](#))

Education

G.H. Rasoni College of Engineering and Management, Pune

2019 – 2023

B.Tech - Computer Engineering — CGPA: 8.7
